

SUPPORT & REPORT

We are your representative to UK yacht and boat manufacturers -

How does it work?

The main boat manufacturers in the UK are Fairline, Princess and Sunseeker. Having previously worked with all three we are familiar with their manufacturing sites, build process and options.

We have worked in the Marine industry for nearly 20 years, dedicating over a decade to supporting dealers and their clients globally. We understand how important a professional and polite manner is when representing and dealing with these brands and clients.

With many dealers of these great British products being based so far away we will complement the dealer's business by being your European representative.

We all know that our customers expect and deserve the best service as this encourages repeat business. An average boat ownership/ upgrade cycle can be quite short, so fostering and maintaining a positive dealer/client relationship is key.

The service that we offer helps to maintain the customer service you and your business have worked so hard to build up and maintain.

We have various ways to cover what you need and help support you.

Testimonial:

John Bush (Director) – Sunseeker Gulf

*“Vicky has been a great asset to
The development of Sunseeker Gulf,
Visiting the factory, reporting on stock
Boats, meeting potential clients to
confirm specifications, plus much more”*
